

Digital floor scale with high capacity seca 813

new

- Especially wide, low platform for easy mounting . high capacity of 200 kg . large, easy to read LCD figures . quick, reliable weighing with step-off function . power-saving automatic switch-off

Stable solution for good health and well-being

When one takes a holistic look at a person's health, that person's weight plays a central role. Excess weight involves the risk of suffering serious metabolic disorders such as high blood pressure and diabetes. Even a slight reduction in weight can help to reduce these risks significantly. The ideal field of application for the highly precise floor scale seca 813 is weight control in the medical sector. For the health-conscious person, it is also the ideal solution for one's own home: it combines comfort, stability and safety.

Especially wide, low platform for easy mounting

The seca 813 combines safety and comfort: the scale can be mounted comfortably and safely due to the extremely low platform (47 mm high) and the non-slip, but pleasantly soft dimpled mat. Older people or persons with walking disability have no problem mounting this floor scale. At the same time, as it is made of a smooth and shockproof material, the platform is extremely hard-wearing, durable and easy to clean.

High capacity and stability

A scale that stands firm: it only weighs 2.6 kg but can support 200 kg. Moreover, the seca 813 has an extra wide platform (433 mm) which is highly stable due to the integrated steel frame. Two good reasons why the floor scale is optimal for weighing heavyweight persons.

Easy to read LCD figures

To ensure that the measuring result can be recorded quickly and correctly, the seca 813 is equipped with an easy to read, 29 mm high LCD display.

Quick, reliable weighing with step-off function

The step-off function is not only practical because the scale does not have to be switched on before weighing, it also ensures that the measuring result is especially accurate as the scale automatically adjusts to zero (null balance) at every weighing. As it weighs very little, the seca 813 is also suitable for mobile use. Any changes in external conditions due to a change of location are accounted for by the automatic zero resetting function and reliably compensated.

Technical data

seca 813

Capacity: 200 kg / 440 lbs

Graduation: 100 g / 0.2 lbs

Dimensions platform (BxHxT): 433 x 47 x 373 mm

Figure height: 29 mm

Weight: 2.6 kg

Power supply: batteries

Functions: step-off, automatic switch-off,
kg/lbs/sts switch-over

Digital flat scale with Bluetooth interface and high capacity

Precision for health

seca 813 bt

- + Solid steel frame, up to 200 kg capacity
- + Non-slip rubber base for safe standing during measuring
- + Large LCD digits for easy reading
- + Transmits weight via Bluetooth
- + Compatible with Google Fit and Apple Health for simple weight trend tracking

seca 813 bt

Digital flat scale with Bluetooth interface and high capacity

Pleasant and comfortable weighing

All platforms are not created equal. For this weighing platform seca has chosen a high quality, two-component raised profile material which is soft like rubber and pleasant to the touch. But don't be fooled – this material is also tough. It fulfills two requirements at the same time: comfortable weighing and an easy-to-clean surface that stands up to all commercially available cleaning and disinfecting products.

A robust, sturdy scale – with a touch of elegance

seca has designed the seca 813 bt with a Bluetooth interface to transfer the Auto-HOLD value automatically to an external device. Thanks to its solid steel frame, the seca 813 bt can withstand high weight and features large LCD digits for easy reading. Furthermore, its wide platform with a low-profile facilitates trouble-free weighing.

Paying attention to details

Weight and girth are no problem for the seca 813 bt. An issue with many scales is the display. Thanks to the 29 mm high LCD digits, it is extremely easy to read the measurements. Additionally, weight values can be shown live on the connected Bluetooth app if viewing the scale display is troublesome. You see, a scale from seca makes life more simple by paying attention to even the slightest details.

Capacity	200 kg
Graduation	100 g
Dimensions (W x H x D)	433 x 47 x 373 mm
Net weight	2.9 kg
Power supply	Batteries
Interfaces	Bluetooth
Functions	Tap-on automatic switch-on, Auto-HOLD, automatic switch-off, kg/lbs switch-over, Bluetooth connectivity
Scope of delivery	4 x AAA batteries
